

GMP+ Feed Safety Assurance is a complete module with standards for the assurance of feed safety in all the links of the feed chain. Demonstrable assurance of feed safety is a 'license to sell' in many countries and markets and participation in the GMP+ FSA module can facilitate this excellently. Based on needs in practice, multiple components have been integrated into the GMP+ FSA standards, such as requirements for a feed safety management system, for application of HACCP principles, for traceability, monitoring, prerequisites programmes, chain approach and the Early Warning System.

With the development of the GMP+ Feed Responsibility Assurance module, GMP+ International is responding to requests from GMP+ Participants. The animal feed sector is confronted with requests to operate more responsible. This includes, for example, the sourcing of soy and fishmeal which are produced and traded with respect for humans, animals and the environment. In order to demonstrate responsible production and trade, a Company can get certified for the GMP+ Feed Responsibility Assurance. GMP+ International facilitates via independent certification the demands from the market.

## REQUIREMENTS : FOR GMP+ FSA CERTIFIED COMPANIES

### 1.3. Sampling

The GMP+ certified company must take samples in accordance with the requirements as laid down in document TS 1.6 Sampling

### 2.2. Requirements per classification of countries of cultivation

As per GMP+ FSA, countries are divided into 3 categories viz.

#### 2.2.1. High risk countries

#### 2.2.2. Medium risk countries

India has been classified under Medium Risk Country of which find below the requirements related to sampling & analysis.

## 2.2.3 Low risk countries

### 2.2.2.4.2. Sample taker

For medium risk countries, each batch must be sampled by an independent superintendent organization accredited according to:

a) ISO 9001 for an appropriate scope in combination with GAFTA3 approval as superintendent for sampling in a relevant application domain (e.g. Animal feed). In case of the direct transport by truck as described above, sampling can be performed and controlled by the GMP+ certified company in compliance with the requirements in document TS 1.6 Sampling,

### 2.2.2.4. Sampling

Sampling must be performed in compliance with the requirements described in document TS 1.6 Sampling.

#### 2.2.2.4.1. Sampling method

The sampler must take representative samples in accordance with the method described in Regulation (EC) No. 152/2009, including the amendments regulated by Regulation (EU) No. 691/2013

## 5.4.2. Sharing of analyse results

The GMP+ certified company must upload analysis results of specific feed product and undesirable substances combinations within a month and must share this result anonymously with the GMP+ Community in the GMP+ Monitoring database.

Our Approval & Services for companies certified against GMP+ FSA programme in India:

- 1. Our partner lab in Germany is accredited for undertaking the analysis as per GMP+ requirements.**
- 2. We having a big team of Sampling & Inspection across India who is approved under the certificate of GAFTA from our partner lab in Germany**
- 3. Our sampling team can perform Inspection as per GMP+ FSA protocol described in Regulation (EC) No. 152/2009, including the amendments regulated by Regulation (EU) No. 691/2013**

As always, **Eureka** is here to support you not only with our **sampling, testing and inspection services**, but also with **expert advice on related topics**.

Please email us for all your upcoming requirements on testing as per above values.
