- **Food and related products:** Soya, Casein powder, Grapes, Potato, Mushrooms, Ginger, Gherkins, Fruit concentrates like Mango pulp etc.
- **Feed stuff:** Organic Colza cake, Sesame cake, Soya meal, Corn, Castor seed cake, etc.

CUSTOMER ORIENTED SOLUTIONS

- Procurement inspection to ascertain the quality at site & analysis at laboratory for quality evaluation

- Visual inspection of the condition of cargo, packing & marking
- Quantity and weight verification
- Incremental sampling as per client specified method or in tune with importing country specifications, if the cargo is meant for export
- Securing the cargo after sampling
- Analytical services with facilities to test all the key areas of food safety and composition testing
- Identification of approved lots, dispatch supervision and container sealing
- Electronic reporting with supportive documents

DNA BASED AUTHENTICATION SERVICE

- Basmati authentication test available for 15 varieties of rice from specific regions of Pakistan and the Gangetic plains of northern India that have been approved by the Indian and Pakistani authorities as **“Basmati”**
- The Microsatellite Genotyping method, developed by the FSA and implemented at **EUREKA** laboratories, is approved as the official method for Basmati authentication test.

EUREKA can arrange **sampling and shipping to testing laboratory** and testing capability to a new 5% tolerance of non-Basmati varieties, can save huge costs for rice importers and exporters
